RETURN TO POMOLOGY
SECTION OF NO. 1. CLATURE
MAY 18 1910

The INDEXED. New Antioch Nurseries

The New Antioch Nurseries were established in 1858 by J. M. & J. B. Van Dervoort. J. M. Van Dervoort became the sole owner by purchase in 1861. At this time only a few hundred trees were grown.

In 1887 the firm name was changed to J. M. Van Dervoort & Son. At this time we are growing trees by the thousands and employ a large number of salesmen, and ship trees into several states. The old, original name, "The New Antioch Nurseries," will be retained and the business as heretofore will be under the efficient management of the junior member—P. C. Van Dervoort.

The New Antioch Nurseries were established over half a century ago and have been under the continual care and direction of father and son, who have made a study of the needs of the locality we cover. We freely offer the results of our care and experience to those who plant our stock and in this pamphlet we offer you in condensed form a reference list of products known to be suitable for our vicinity.

The same consideration for the interests of our customers and the same manner of doing business will prevail in the future as in the past. This is assured in the fact that P. C. Van Dervoort grew up with and in the business and became thoroughly identified with all its interests and for several years prior to the demise of the senior member was general manager and head of operations. We believe this is sufficient guaranty that you will be properly cared for in placing orders for our stock of whatever kind.

We have hundreds of customers who buy their Nursery Stock from us exclusively. We solicit a trial order from you (if not already a customer,) desiring to add your name to our long list of satisfied customers. We make a specialty of growing stock for the home.

Have You a Home

Is it properly surrounded with shade or fruit trees?

Do you have ornamentals, shade and vines to lend a touch of color and variety to your lawn?

Is your present setting of small fruits sufficient?

Does your home have that inviting, restful appearance you so much admire?

We are diligently watching the various kinds of new fruits to see how they succeed in our locality.

Many of these come highly recommended by interested parties which fail to make good with us. We never have made it our mission to push a new fruit on our customers before it has been well tested under our observation. We advise our customers to buy very sparingly of untried, high-priced nursery stock. Buy from a near-by nursery when you can. It saves you money and assures you goods not dried up and dead when delivered.

Notice to Customers

1 Orders should be sent in as early as possible, that there may be plenty of time for shipping long distances when necessary.

2 Buyers ordering by letter, should write out their orders plainly, on a separate list, and not on the body of the letter. It will prevent mistakes in the hurry of the packing season.

3 Give plain and explicit shipping directions. When none are given we forward ac-

according to our best judgment; but in no case do we assume any responsibility after the delivery of stock in good condition to the forwarder.

4 All orders from unknown correspondents must be accompanied with the cash or satisfactory references.

5 We recommend that purchasers leave the selection of varieties with us, as far as possible, merely stating the proportion of summer, fall or winter fruit wanted, as our experience enables us to select such sorts as are adapted to the locality. We will cheerfully give our personal attention to all such orders, and our customers can depend on getting, not only the best varieties, but those that are best adapted to the location.

6 Immediate notice should be given us of any error in filling out an order, so that we may at once rectify the mistake, or give a satisfactory explanation.

For reference we refer you to either of the three National Banks of Wilmington, O.

Fruit Trees

Select thrifty, young trees in preference to old large ones; the roots are more tender and fibrous and they bear transplanting better and are more apt to live; they can also be more easily trimmed and shaped to any desired form, and in the course of a few years will usually outstrip the older ones in growth. The following is a price list of some of the tested varieties of Fruits for this locality:

APPLES

We can furnish all varieties usually catalogued, but the following list comprises the most desirable varieties.

Price: 2 and 3 year old, first class, 30 cents each, \$2.50 for 10.

SUMMER VARIETIES

Yellow Transparent	Red Astrachan
Early Harvest	Sweet Bough
Benoni	Golden Sweet
Oldenburg	Jeffreis

AUTUMN VARIETIES

Maidens Blush	Western Beauty
Wealthy	Ortley
Fall Pippin	Jersey Sweet
Snow	Gravenstine

WINTER VARIETIES

Baldwin	Northern Spy
Bellfleur	Opalescent
Ben Davis	Rome Beauty
Gano	Golden Russet
Delicious	Smith Cider
Fallwater	Stark
Grimes Golden	Staymens Wine Sap
Nonesuch	Banana
Jonathan	Wine Sap
M. B. Twig	York Imperial
White Pippin	Winter Blush
Romanstem	King
Pewaukee	Rhode Island Greening
Paradise Sweet	Wagener
Transcendent Crab	Rambo

Our apple trees are all budded on whole-root French crab seedlings. We get a better

root system, and therefore a longer lived tree by this mode of propagation. They are far superior to piece-root grafts and the planter should consider this when buying an orchard.

PEACH

Our Peach are all budded on seedlings grown from natural seed procured for us in the mountains of North Carolina, and are free from *Peach Yellows* and other dangerous diseases.

Price 4 to 6 ft. first class 25 cents each, \$2 00 for 10

Price 3 to 4 ft. medium 20 cents each, \$1.50 for 10

Price 2 to 3 ft. 10 cents each, .75 for 10

Price: 2 year old, \$2.00 per 100.

Conover	Palmetto	Columbian Mammoth White
---------	----------	-------------------------

RHUBARB

Price: 10 to 15 cents each.

Early Scarlet	Linneaus
---------------	----------

NUT BEARING TREES

American Sweet Chestnut, 3 to 5 ft., .50 cts.	
Sober Paragon " 4 to 6 ft., \$1.50.	
Spanish " 3 to 4 ft., .75 cts.	
English Walnut, 1 to 2 ft., .75 cts.	
Shell Bark Hickory, 5 to 7 ft., .75 cts.	
Black Walnut, 4 to 6 ft., .75 cts.	

VEGETABLE PLANTS

We grow these in large quantities and can supply them in season at the market price.

SWEET POTATO PLANTS

Red Bermuda, Southern Queen, Red Jersey, Yellow Jersey GRANT VINELESS. This is a variety that we introduced into this county some years ago. It makes but little vine. It is a good yielder of large smooth potatoes. They are as easy to keep as Irish potatoes and do not lose their flavor while in storage—no matter how long.

We grow 100,000 Sweet Potato plants each season. Cabbage, Tomato and other plants in large quantities.

Ornamental Department

This is one of our specialties and we can show a better lot of shade trees than any other Nursery in Southern Ohio. While most people appreciate well arranged and well kept grounds, large or small, many fail to realize that they too can have equally fine grounds. Aside from the pleasure of having fine trees, shrubs, vines and flowers in the grounds surrounding a home, few realize how much these add to the commercial value of the place. A purchaser having to decide between a house on bare and unkept grounds and one surrounded by fine ornamentals, invariably chooses the latter, at a marked advance in price, because he sees that he will at once enjoy what it would otherwise take some years to secure. Sagacious men are led by a knowledge of these facts to plant fine trees and shrubs about vacant lots they are intending to put upon the market. Lots thus planted readily secure purchasers at good prices when bare grounds go begging for buyers.

UPRIGHT DECIDUOUS TREES

- Aralia, Spinosa, 6 to 8 ft., 75 cts.
Ash, American, 6 to 8 ft., 75 cts.
Beech, Purple leaved, 3 to 4 ft., \$1.25.

TESTIMONIALS

FRUITVALE, OHIO, JULY 24, 1905.

J. M. Van Dervoort & Son,
Wilmington, Ohio,

My Dear Sirs:—

As you no doubt remember, I bought of you last fall 2,000 peach trees and promised to inform you later on, how I succeeded with them.

Well, on last Saturday, July 22, 1905, I counted the trees and if I made no mistake I have 1,996 living trees from the 2,000 bought of you and never saw a prettier prospect for an orchard.

The above statement don't mean that I only lost four trees, for your count more than held out. I think that the exact number planted was 2,035, showing a loss of 39 trees; less than two per cent of all planted.

Wishing you the best of success in the business, I am, yours truly,

JOAN A. MOOMAW,
Farmer and Fruit Grower.

"They are Reliable"

My mother said more than fifty years ago that the "New Antioch Nurseries are Reliable" After buying rather liberally from them for forty years, I repeat my mother, and say, "They are Reliable."

JOHN D. WHITE,
Wilmington, Ohio.

CINCINNATI, OHIO, NOV. —, 1914.

Gentlemen:

Enclosed find check for \$—, in full for peach trees. I thank you for the excellent lot of trees.

JNO. D. MURRAY.

We have any number of testimonials but space will not permit of any more in this catalogue.

While we exercise the greatest diligence and care to have all our trees, etc., true to label, and hold ourselves in readiness, on proper proof, to replace all trees, etc., that may prove untrue to label, free of charge, or refund the amount paid, it is mutually understood and agreed to, between the purchaser and ourselves, that our guarantee of genuineness shall in no case make us liable for any sum greater than that originally received for said trees, etc., that prove untrue.

If your order is satisfactory, tell others,
If not, tell us.
